

N° 41 : August 2017

VLUX is one of the most active world leaders in the development, production and commercialisation of quality weatherproof luminaires.

NEW SINGLE BODY LED WEATHERPROOF

We have just launched the SINGLE BODY weatherproof luminaires with high efficiency LED components. With a 6 years experience on the TWIN BODIES versions and after extensive testing, we have designed the new SINGLE BODY versions [PAS](#) and [FUTURIX](#) with high performance and long lifetime.

Also the [FUTURIX LED ECOLINE](#) range has been completed with the new SINGLE BODY versions.

INCREASED EFFICIENCY

We have upgraded the performance of our high efficiency LED weatherproof luminaires with the new generation LED components: [PAS](#), [FUTURIX](#), [PLedX](#) and [PAC](#) reach now more than 145 lm/W

For the same lumen output as before, the energy consumption is much lower now.

PRODUCT UPGRADE

As a result of our constant aim to upgrade the quality of our products, the reflector retainer clips for all weatherproof TWIN LED types have been changed.

All new productions are equipped with this improvement: [Link to larger photo](#).
